

# **PSUL before 1963**

This is unashamedly a “work in progress” – an endeavour to project **PSUL** back from its origin in summer 1963. Therefore, it is very far from a complete listing of qualifying lines and services.

The listings are taken from timetables (working timetables, unless otherwise specified), in chronological sequence as available, and are therefore comprehensive only for the content of each individual source document.

Format, notes and use of 24-hour clock are (intended to be) consonant with current-day **PSUL** practice. Junction titles may not be absolutely correct for the period they represent - and certainly may differ from current nomenclature.

Those routes having a service that could reasonably be found from a contemporary public timetable are not included (even though they might have qualified for inclusion in **PSUL** at some other date).
